VIA University College

Programming 3

Autumn 2026

Learning Objectives

- By the end of this session, you should be able to:
  - ✓ Explain Spring Data JPA
  - ✓ Explain Spring Data Repositories Interfaces
  - ✓ add Spring Data JPA to Spring Boot
  - ✓ Explore Domain/Entity annotations

What is Spring Data JPA?

- Spring Data Java Persistence API (JPA) is used to reduce the amount of boilerplate code required to implement the data access object (DAO) layer.
  - It includes both relational databases systems and NoSQL data stores.
- It supports advanced integration with Spring MVC controllers.
- It provides support for creating JPA repositories by extending the Spring Data repository interfaces.
